

Melamine Certificate

Formula Hill:

Molar Mass:

CAS N°:

Date of print: 29 July 2022

123910

Trans-30 K

Information on melamine with respect to the FDA guidance “Pharmaceutical components at risk for melamine contamination” (published August 2009).

The fraudulent addition of melamine to food raw materials with intent to simulate a higher nitrogen content has come to the attention of the relevant authorities. In August 2009 the US FDA published a list of materials at risk. The scope of the FDA recommendation refers to pharmaceutical components containing nitrogen in the chemical formula and materials derived from milk.

With regard to the scope of the above-mentioned FDA guidance for materials which do not contain nitrogen in their chemical formula and are not derived from milk no special risk assessment with respect to melamine is performed.

We confirm that this product does not contain melamine. Furthermore, the product has not been in contact with any substance containing melamine, and no risk of melamine
