

ACS REAGENT CHEMICALS

 DC Fine
Chemicals
A different kind of chemistry

A DIFFERENT KIND OF CHEMISTRY

At **DC Fine Chemicals** we are committed to quality products and customer satisfaction.

As an ISO 9001 accredited company we are fully compliant with international quality standards.

We offer an extensive portfolio of raw materials which can be shipped, worldwide, promptly from our facility located near Barcelona, Spain.

● GLOBAL SOURCING

Access to over 3,000 raw materials from our database. We can supply products even if they're not listed in our inventory.

● LOT-TO-LOT CONSISTENCY AND BATCH TRACEABILITY

We release lots only when they meet our specifications, provide full batch traceability from manufacturer to final destination, and can hold approved batches for future deliveries to reduce testing costs.

● TOTAL PROCUREMENT

We manage the supply of your raw materials portfolio, order your products, store them, and provide just-in-time delivery.

● CUSTOMISATION POSSIBILITIES

We cater to your specific product requirements, including custom labeling, additional quality control testing, packaging, product format and specifications.

● MARKET KNOWLEDGE & INNOVATION

We constantly expand our product portfolio, quickly address raw material shortages, and proactively work on sourcing solutions. DC Fine Chemicals also invests in innovation and product development for a steady influx of new products.

● REGULATORY COMPLIANCE

We operate our facilities according to the highest health and safety standards, ensuring compliance with the latest chemical regulations through our in-house team of experts.

● SUSTAINABILITY

We are committed to sustainability and environmental protection. Our strategies focus on waste management, recycling, reducing resource and energy consumption, and consistently improving our environmental systems (ISO14001)

QUALITY ACS REAGENTS FROM DC FINE CHEMICALS

At DC Fine Chemicals, we focus on quality and innovation. We maintain a high level of quality of both the products and service which we provide. This is especially important in the supply of analytical reagents. From this background, we bring you a range of ACS reagents, produced and tested to conform to the American Chemical Society monograph for analytical reagents. This range meets the quality benchmark for analytical reagents, offering our customers reliable products for analysis and production where this standard is required. This ensures reliability, consistency thus reproducibility for your analyses and processes.

RELIABILITY THROUGH RELIABLE ANALYSES

Our analytical reagents are rigorously tested in our in-house QC lab to ensure conformance. We know that the quality and purity of the analytical reagents used is decisive for the daily tasks performed in the laboratory. The higher and more consistent the quality of the reagents, the lower the risk of an analysis having to be repeated because of non-reproducible results. Moreover, upholding such high-quality standards over time contributes to cost-efficiency, simplifying audit processes and minimizing the need for extensive validation effort.
