

MISSION

To supply fine chemical raw materials for the life science sector, with excellent customer service, in order to simplify our customer's processes and contribute to their success.

VISION

To contribute to scientific knowledge and progress through supply of our products and services.

VALUES

Our activity is structured within the framework of a formal quality management system enhanced by continuous improvement in accordance with ISO 9001:2015, EXCiPACT and Good Manufacturing Practices (GMP) standards, with special emphasis on three fundamental values:

-  **BONDS:** we foster close relationships with our staff and business partners to provide a personal service.
-  **OPTIMISATION:** we prioritise quality and excellence through innovation as a key driver for development.
-  **KNOWLEDGE:** our extensive scientific knowledge and experience are the corner stone of our business.

STRATEGY FOR SUSTAINABILITY

We include sustainability in our business strategy and our relationships with the Company's stakeholders. We consider the environmental, social and corporate governance aspects of our organization and we have a written plan that details initiatives and activities intended to contribute to a more sustainable world.

In addition to compliance with relevant legal requirements, we address sustainability using five fundamental principles:

-  Protection of the environment
-  Prevention of pollution
-  Waste management and recycling
-  Reduction in the use of resource and energy
-  Continuous improvement of our environmental impact system (ISO 14001).

This comprehensive management system will be monitored and reviewed periodically to achieve our policy objectives.
